

Team 59 Python 1 ACT Task 2

- To get the following output:
 - The volume of a sphere is 904
[cm^3] ...
- One should change the code so as to make volume an integer.
 - `print ('The volume of a sphere is ',
int(volume), '[cm^3] for a given')`
- To get the following output:
 - The volume of a sphere is 905
[cm^3] ...
- One should change the code so as to round volume up to the next integer.
 - `print ('The volume of a sphere is ',
math.ceil(volume), '[cm^3] for a
given')`
